

NorthSec Research Conference 2026

Advancing Security Research in the Mediterranean Region

Organized by

Cyberforce & Ensecrowd

Welcome Message

Welcome to NorthSec 2026:

textitThe Andalusian Cipher. According to the official event brief, NorthSec is Northern Morocco's largest applied security event and a three-day national conference that brings together engineering students and industry professionals for technical sessions, workshops, and competitive CTF activity.

This 3rd edition is organized in Tangier by student-led clubs from Université Abdelmalek Essaâdi, with CyberForce (FSTT) and Ensecrowd (ENSA Tangier) coordinating core activities. The event timeline includes online qualifiers before the on-site program, and an immersive weekend focused on practical cybersecurity skills, community building, and high-intensity challenge solving.

Program Chair

NorthSec Research Conference 2026

Schedule — Day 1: Friday, April 24, 2026

Time	Session	Speaker	Room
16:30	Reception & Participant Check-in (badge distribution, participant kits)	Organizing Team	Foyer
17:00	Official Opening Ceremony	Organizing Clubs + University Representatives + Sponsors	Main Hall
18:30	Coffee Break	—	Foyer
18:45	Opening Keynote: AI in Cybersecurity	Lahoucine Hamouni (42 Network / UM6P, HTB MVP Morocco)	Main Hall
20:00	Dinner Cocktail & Networking	Participants + Sponsors	Reception Area
20:30	End of Opening Evening	—	—

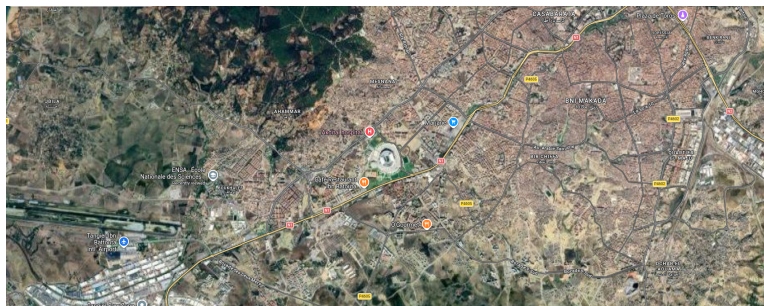

Schedule — Day 2 & Day 3: April 25–26, 2026

Time	Session	Speaker	Room
09:00	Technical Sessions: modern attacks, enterprise defense, AI in security, vulnerability research	Invited Experts & Community Speakers	Conference Rooms
11:00	Hands-on Workshops (industry-led practical labs)	Workshop Facilitators	Workshop Labs
14:00	CTF Briefing: gameplay, squad rules (max 4 operators), scoring model	CTF Staff	Main Hall
15:00	CTF Launch (20 hours non-stop, dynamic scoring, first blood bonuses)	Competing Teams	CTF Arena
11:00 (Day 3)	CTF Final Phase + Live Leaderboard Wrap-up	CTF Staff & Teams	CTF Arena
15:00 (Day 3)	Closing Segment, Recognition, and Community Wrap-up	Organizing Committee	Main Hall

Speaker Bios

1. Lahoucine Hamouni (42 Network / UM6P, HTB MVP Morocco) is featured as the opening keynote speaker with a session on AI in cybersecurity during the Day 1 evening program.
2. CyberForce (@FSTT), founded in October 2025, is one of the lead organizing clubs for NorthSec 2026. The club focuses on turning students into practitioners of applied cybersecurity.
3. Ensecrowd (@ENSA Tangier), founded in September 2024, co-organizes the event and is known for challenge design, technical creativity, and problem-solving oriented training.
4. R4VENOUS is an independent security researcher specializing in network anomaly detection and threat intelligence. He has presented at numerous regional and international conferences under this alias. For correspondence, reach out via: r4v3n0us.research@proton.me.
5. NorthSec 2026 publishes tracks centered on sessions, workshops, and advanced CTF gameplay across cryptography, web/reverse engineering, pwn/exploitation, and forensics domains.

Venue & Logistics

Venue

Tangier, Morocco (official NorthSec 2026 on-site location).

Event Timeline

Online Qualifiers: April 18, 7:00 PM to April 19, 7:00 AM.

Main Event (On-Site): April 24–26, 2026.

CTF Format Snapshot

NorthSec describes the competition as a realistic enterprise-network simulation with 20 hours of non-stop play, teams of up to four operators, dynamic point decay, and first-blood bonuses.

Address Summary

NorthSec 2026 Main Event

Tangier, Morocco

Sponsors

Institutional Partners	Community Partners
 Abdelmalek Essaâdi University, FST Tanger, ENSA Tanger, and regional partners support venue logistics and academic collaboration.	 CyberForce and Ensecrowd coordinate the technical program, volunteers, and challenge experience for participants.

Sponsor logos are represented by framed boxes in this fictional conference program.

Program Notes

NorthSec 2026 combines a conference format with a competitive practical layer. Official material highlights three core pillars: technical sessions, hands-on workshops, and a high-intensity CTF environment modeled after realistic enterprise infrastructure.

The event positions itself as a bridge between theory and live operational practice, with emphasis on modern attack paths, defensive engineering, and community knowledge transfer. Participants are encouraged to collaborate across tracks and treat each phase of the weekend as part of a continuous learning experience.

Travel Information

Tangier is the official host city for the on-site phase of NorthSec 2026. The event website references geo-coordinates near central Tangier (35.73833° N, -5.89278° W), and attendees should monitor official channels for venue access and registration updates.

For travel planning, participants should account for two phases: remote online qualifiers on April 18–19 and on-site participation from April 24–26. Registration and operational updates are distributed via NorthSec channels and organizer communications.

Code of Conduct

NorthSec 2026 is committed to maintaining a professional environment where discussion remains respectful and inclusive. Harassment, intimidation, discrimination, and disruptive behavior are not acceptable at any conference venue, satellite event, or social gathering connected to the program.

Participants are expected to follow the guidance of venue staff and organizing committee volunteers, especially during safety announcements, room changes, and crowd-management procedures. Anyone who experiences or witnesses a problem should contact a member of the organizing team so that the issue can be addressed promptly and appropriately.

Acknowledgements

The organizing committee extends sincere thanks to the program reviewers, session chairs, technical staff, and volunteers who helped turn the conference concept into a coherent three-day event. Their time and attention made it possible to assemble a program that is both varied and operationally practical.

We also acknowledge the speakers who contributed original material, the attendees who support the event through their participation, and the institutions that encourage research in security, privacy, and resilience. Their combined effort gives the conference its value and its continuity.

Contact and At a Glance

Conference Name	NorthSec Research Conference 2026
Dates	April 24–26, 2026 (on-site)
Venue	Tangier, Morocco
Theme	The Andalusian Cipher
Organizer	CyberForce (FSTT) & Ensecrowd (ENSA Tangier)
Program Structure	Sessions, Workshops, and 20-hour CTF
Public Profile	Available on request
Social Media	@r4v3n0us (Telegram)

For logistical questions during the event, attendees should consult the registration desk or the volunteer team positioned near the main hall. For archival and post-conference inquiries, the conference materials will remain associated with the NorthSec Research Collective.
